

pdCensus2000 – Census Demographics Database

In addition to **Latitude** and **Longitude** coordinates (in six-decimal, degrees/minutes/seconds and radian formats), the following 152 demographic variables are built in to the **pdCensus2000** package. Included are most useful counts and calculations drawn from U.S. Census Bureau Summary Files 1 and 3, and succeeding updates. *Summary File 1* (SF1) documents actual counts from the Census, while *Summary File 3* (SF3) provides estimates based on long-form responses.

With this product, users can match at multiple summary levels against their lists to append these 2000 Census demographics. Summary levels include: National, State, County, County Subdivision, Census Tract, Census Block Group, 3-digit Zip Code Tabulation Area and 5-digit Zip Code Tabulation Area.

Group: general demographic category; Geography, Population, Housing, Income or Work. **Set:** name of the set of related variables the demographic belongs to. **Field:** name of the field from the **pdCensus2000** database. **Source:** U.S. Census Bureau source file the demographic variable is from; SF1 or SF3. **Description:** data definition of the demographic variable.
